Performance Commentary

Question: What do you think of the entire performance?

Answer: The athlete's **entire performance** was poor. During the execution of a single Axel jump (1A), there was a **rotation shortfall**. A combination jump, consisting of a double Salchow and a double toe loop, also had severe **under-rotation** issues, with the latter displaying additional technical flaws. Additionally, the double Lutz (2Lz) was also severely **under-rotated**. Throughout the routine, there were a total of three falls. Apart from this, the **overall composition and performance scores** were also subpar. The athlete's **emotional expression** lacked engagement, weakening the routine's artistic impact.
